EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022 - 2026

Meghnad Saha Institute of Technology CGPA: 7.2

PERSONAL PROJECTS

Multi-Tenant SaaS Application

A multi-tenant project and task management platform with organization-level data isolation.

- Implemented JWT authentication, authorization middleware, and protected REST APIs.
- Developed organization, user, project, task, and dashboard workflows with tenant-aware data access.

Technology Used: MongoDB, Express.js, React.js, Node.js, JWT, REST APIs

ShopSphere – Microservices E-Commerce Platform

A high-performance e-commerce platform designed with independently deployable backend services.

- Designed API Gateway, Auth, User, Product, Cart, Order, Payment, Inventory, Notification, Review, and Search services.
- Worked with service-specific REST APIs, PostgreSQL/MongoDB integration, authentication, and Docker-based infrastructure.

Technology Used: Node.js, TypeScript, Express.js, PostgreSQL, MongoDB, Docker

AI Audio Deepfake Detection Model

Final year project focused on detecting real vs AI-generated audio.

- Built a machine learning workflow for audio classification using preprocessing and feature extraction.
- Prepared data and evaluated model performance for real/deepfake audio detection.

Technology Used: Python, NumPy, Pandas, Machine Learning

Offline UPI-style Distributed Payment Prototype

A distributed payment simulation for offline voucher-based transactions.

- Implemented signed vouchers, local transfer simulation, settlement sync, and double-spend detection.
- Designed the system flow to support secure transaction verification without continuous network access.

Technology Used: Java / Node.js, SQL, REST API Concepts

Distributed Big Packet Transfer System

A large-file transfer system using distributed node communication.

- Implemented packet fragmentation and transfer coordination for efficient large-file transmission.
- Added fault-tolerant routing concepts to improve reliability during packet transfer.

Technology Used: Java / Python, Computer Networks, Distributed Systems

Weather API and Utility Web Apps

Frontend projects built during web development practice and internship learning.

- Built Weather API, To-Do List, QR Code Generator, and Clock applications using responsive UI basics.
- Practiced API integration, DOM manipulation, form handling, and user-focused interface design.

Technology Used: HTML, CSS, JavaScript, API Integration

EXPERIENCE

Data Annotator Intern *3 months*

iMerit Technology | Kolkata

- Annotated and reviewed datasets used for AI/ML model training.
- Maintained data quality by following annotation guidelines and review standards.
- Gained exposure to AI workflows, data preprocessing, and model training pipelines.

Web Development and Design Intern *1 month*

Oasis Infobyte | Remote

- Built responsive beginner-level web projects using HTML, CSS, and JavaScript.
- Improved practical understanding of frontend structure, styling, and browser-based interaction.

Current Learning

MERN Stack Development with AI | Desun Academy

- Currently learning MongoDB, Express.js, React.js, Node.js, REST APIs, and AI-integrated web development.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, JavaScript, Python, SQL, HTML, CSS
Backend: Spring Boot, Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS, JavaScript
Databases: MySQL, PostgreSQL, MongoDB
Tools: Git, GitHub, Postman, VS Code, Docker
Core Subjects: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering
Areas of Interest: Full Stack Development, Java Backend Development, MERN Stack, Microservices, Problem Solving, AI Integration

ACHIEVEMENTS AND CERTIFICATIONS

- Acquiring Core ABAP Skills, 2025
- WBJEE Rank: 12048, 2022
- Participated in Smart India Hackathon, 2023
